palattal residence of the surip villa-as, who stood, hat off, on his steps, bowing to the squatters, who in turn raised their hickery caps and did him homage.

But why one werate the whole serrow of the Demograts? After dinner, the Chief Squatter and his strengting cohorts repaired to the "circus lot," where he rehearsed that same old speech to a crowd of perhaps two thousand—half of them again wearing Lincoln badges. The ohly remarkable circumstance here was the entire absence of enthusiam, and the fact that Douglass sinusely was ordently prestrated More Veting Precincts.

The Squatterite leaders, gamt and hungry from outside exposure for a long time past, are still grinding away at their doleful melodies about the need of more voting precincts in Chicago to secure an opportunity for all the people to vote. This comes with charming grace from the very men who used to carry elections and hold power hereby the very trick of managing that all the people should not vote. Look at the Seventh Ward and Tenth Werd polls at late elections under Republican away, and compare them with what they were in the days of Mayor Dyer, when howling and drunken Cells took fereible possession of the approaches to the ballot box, and drove houset Germans the ballot box, and drove houset Germans away; when a craves and corrupt police dared not interfere, and when ettiesse who did oppose such outrages, were beaten and maltreated. It was among the earliest fruits of in-coming Republican reform that an Irish Democratic Alderman elect served out his term in jail for heading an election mob.

Yet these gentlemen are now in the field, and conniving with Republican soreheads to secure greater facilities for all the people to vote, and Aldermen Myers, and Marshall, and McDonald, and other Democratic City Fathers, have, on two evenings of this week, gathered in the Common Council Chamber, hoping that out of

Let them rally no "byea" on the evening before, to spend the night at the pella. Let them give no instructions to the "byea" to keep in the lines all day after they have voted once, nor go from the lines of one ward to that of another, to the end of protracting the voting, in the hope of waring out the patience of men who are in haste to return to their banks and stores and offices. Boss. Sept. 16, 1860.
We have had almost an accident on the rail-road between Rolandseck and Anderrasch, the story of which came so directly to me that I must believe it, although no hint of it comes in the papers.

this desire called in an attendance of Republi-cans from various points in the State, and their presence did much to swall the crowd. Still it would have all been counted for Little Dug, story of which came so directly to me that I must believe it, although no hint of it comes in the papers.

On the 24th inst an extra train left Cologno for Coblents, and the down train was telegraphed to await at a station this side of Anternach until it had passed, there being but one track. By whose fault is not known, but the conductor of the down train was not informed of the measure, and at a curve in the road somewhere near Brohnl, the witchman suddenly law the extra train rushing in one direction, the regular one in the opposite, directly against each other. His red flag of danger was seen by both engineers, waving the extra train to stop, the other to return to the station. The extra train was moving at lighting speed, and could not at once be brought to; the engineer of the other undertook to reverse his engine, but the machinery refused to work! "We must jump for our lives," he said to his companion, but before doing so, he determined to try once more. Fort, nately this time with success, and when the extra train came thundering up, the other had begun to gather way, and the crash was just barely escaped.

A few seconds more, and the accident would have had a place in history through all time; for, upon the extra-train were the Queen of England, her hebeaud, Prince Albert; her daughter, Alice: Lord John Russel, and the esture royal party now visiting Germany! but for the spirit and e-terprise of our boys here who were not to be caught napping, but established and maintained throughout the day, several stands, where nest Lincoln badges

day, several stands, where neat Lincoln badges were given away free. Every Republican was flus made to show his colors. The thick sprinkling of Lincoln Badges in that Squatter crowd was "a settler." Some secounts say the Republicans nearly equalled the Squatters.

This they might easily do, for the thing was a failure. "Since Pennsylvania" the Equatter forces don't seem to take an interest in politics, and there was no inducement to see Stephen or "wake him again." The attendance about the stand was a meagar one. At the time when it was the largest, I paced the entire circuit and made it 140 paces, and thinly ranged circuit and made it 140 paces, and thinly ranged circuit and made it 140 paces, and thinly ranged at that.

Stephens of Georgia did not come, and no one expected he would; and Stephen had it all to himself. His speech was the same old strain, well worn, and delivered at the lowest ebb of spirits and voice. The curse Little Dug himself evoked in this very Springfield upon "the rathless hand" that sheuld invade sacred compromises, seemed to have finally come home to the speak. T. He was in the worst of tempers, abused evrybody, and ranted against Lincoln,

Ha gives South, therefore, to callect the nucleus of a party for 1864. He goes from the North, which he has swindled to the goes to Memphis and Mooile, in the capacity of an unfortunate creditor, begging a small payment on account. But his balance against the slave oligarchy is like a Mississippi bind: it has been repudisted in bits, and cast out of the ledger. The Damorracy on the other side of Mason and Dixon's line are not aware that they owe him anything. We happen to know that they do; but if he has taught them the art of beiraying their friends—if he has given them great and conspicuous lessons in the mystery of cheeting the North—it is not for us to complain if they finally "gouge" him out of As dues. The fact that he has been unfairly dealt with by the Scuth in his long, laborious, and degrading service for slavery, has so taken possession of his followers here that they are ready to shoulder their thuskets and quesch Daunton'sm in South Carolina or Massispip with blood. majority will be cast for the Republican ticket in Illnois in November—and he knows it.

It is hardly possible that a single sectoral vote should be cast this year for "Doughs and Popular Sovereignty." That alogar, once so potent, has become a jest, with which people designate the last degree of pitiable weekness. Good bye, Stephen! THE TRUE REASON STATES.

Beswhere in this paper we print an article com the Charleston Mercury, the organ of the simunionists, in which the reasons for secussion, in the event of the election of Mr. Las-coln, are succently put forth. Our readers will see that, when simmered down, these reasons, arrayed under claves heads, are all emprised under one count, and that is this: A Republican Administration at Washington will break the tyranny by which the nonor being over, the people of the South, overished by this system of forced and unimpovertabed by this system of forced and un-paid isbor, undenced by reason of the neces-sary sparseness of population and the attend-ant absence of schools, and degraded by association with the ord practices and lawless maxims by which Slavery is sustained, will be permitted to inquire why it is that they have not the social, educational, religious, in-dustrial and commercial advantages which the people of the North possess—why it is that avenues to labor and competence are shut up muses to labor and competence are shut up-inst them—why their ladd in Virgini, stucky and Missouri'is not worth as much acre as free land in Pennsylvania, Ohio Hillands—why an aristograpy of 350,000 rebolders should longer be permitted to re all the honors and emolements of the

It is said that not one in a thousand of the Neapolitans had ever seen an Italian version of the Bible, until the flight of Bomba, and the occupation of Naples by Garibaldi, when Diodati's version, printed in England, was expected for sale in the principal streets of that city, happly finding many purchasers. The circulation of the Bible had, before that time, been prohibited by the government by stringens peculiars. In Sardinia, as our readers are aware, there is no restriction whatever in the circulation of the Bible. It is sold all over the kingdom, taught in the schools, and only in the vicinity of Genoa do the priests have much influence against it. It was freely introduced into Lominardy and Tuscany and the Dushies after the onnerations, and it will be with many people one of the Sardinian sway, that wherever it extends the Bible follows unobstructed in its footsteps.

abandoned the idea of attacking Rome or Venice, and has invited Victor Emacuel to come in person and assume the command of the liberating army—an invitation which may possibly be accepted, inasmuch as the Sardinian Parliament has resolved that the King be authorized to annex to Sardinia those provinces of Central and Southern Italy, in which the population by a direct universal suffrage, vote to become an integral part of the Constitutional Monarchy.

The Terrors of Submission

The Terrors of Subsmissions.

(From the Chainsten Mecany, of October 11th.)

A few days since, we endeavored to show that the pictures of rais and desoistion to the South when the submissionists to Shock Repiblican domination were so centiumily drawn, to "fright as from our propriety," were unreal and false. We propose now to reverse the picture, and to show w. as will be the consequences of a submission of the Southern Sistes to the rule of Aboltitionism at Washington, in the persons of Abraham Lincoln and Hamin, should they be elected to the Presidency an Vice Presidency of the United States.

1. The first effect of the submission of the South to the installation of Aboltitionism at Washington, in the persons of Abraham Lincoln and Hamin, should they be elected to the Presidency of the United States.

1. The first effect of the submission of the South to the installation of Aboltitionism at Washington, in the persons of the Presidency of the United States.

1. The first effect of the submission of the South to the installation of Aboltitionists in the offices of President and Vice President of the United States, must be a powerful consolidation of the South will be complete. Addition party at the North Success generally strengthens. It will be "colling its sling it sainly folds around our dear "strike source our event with the testing of the Malain and Tenanty, the constraints of the South is in its perpetual propagation. The first president of the Multiple States, must be a powerful consolidation of the South will be complete. Addition party at the picture, and the states our eventual propagation of the South is the interest of the Aboltition party at the North Success generally strengthens. It will be "colling its sling it sling it states, will be "colling its sling it sling it states, will be "colling its sling it sling

must be irresisable in controlling the general government.

2. To plunder the South for the baredi of the North, by a new Protective Tariff, will be one of the first measures of Northern sectional dominion; and, on the other hand, to exhaust the Treasury by sectional schemes of appropriation will be a congenial policy.

3. Immediate danger will be brought to slavery in all the frontier States. When a party is enthroned at Washington, in the Executive and Legislative departments of the Government, whose creed it is to repeal the fugative always law, the under ground raifroad will become an one-ground raifroad. The tenure of slave property will be felt for the cotton States for sale, and the frontier States onler on the policy of making themselves Free States.

4. With the control of the Government of the Brutal Treelment of a Massachusetts Man in Alabama.

(From the Bostes Journal)

Mr. William J. Brewster, a young man belonging it Kingston, Mass, was recently driven from Alabama under very aggravating dirounstances. Mr. Brewster had been requested to take charge of a school at Somerville, in that State, and proceeded thither for that purpose. He was hospitably received at Valtermeso, Ala, and introduced from that place to Somerville. The Trustees of the Academy ratified and confirmed his appointment; but the very first morning after his arrival three, when he was about to enter on his duties, a letter having been received by Col. Ru her, one of the principal inhabitants, from two citizens of Charleston (personally unknown to Col. Ruther) demonacing him as an aboliticals, on the authority of an acong most fellow-passenger in the a samer by which he sailed from Boston to Charleston, a meeting of the inhabitants of Somerville, in which Judge William H. Campbell and Mr. Lawyer Patterson were prominent, and by vote of the meeting he was notified to leave the place/before noon.

White he was seeking for a conveyance, his struks were searched, an a letter from Charles Samner, three years old, having been found, among lettera from Lewa Gaus and others, new excitament was created. All conveyance was denisted him, and he was forced to walk eight miles under a burning sun to Valkermose; nor was this all; he was pursued and overtaken on his walk by three mounted citizens—Charles England, his son, and Thomas H. Morrow—bho abused him and by brute force threw him into a pond. He errived here we min to say, but he thought beast to pursue haisjacracy homsward with all convenient aspeed, and arrived here two or three days since. Mr. Brewster's expulsion took piace on the 5th inst. Statements above given are confirmed by Southers and contraction. The Cutarestin Course prints the contraction of the

4. With the control of the Government of the United States, and an organized and triomphant North to austain them, the Abolitionists will renew their operations upon the South with increased courage. The thousands in every country, who look up to power, and make gain out of the fature, will come out in support of the Abolition Government. The Brownlows and Botts', in the South, will multiply. They will organize; and from being a Union Party, to support a Abolition Government, they will become like the Government they support, Abolitionizat. They will have an Abolition party in the South, of Southern men. The contest for slavery will no longer be one between the

reved here two or three days since. Mr. Brevater's expalsion took piace on the 5th inst. Statements above given are confirmed by Southern pagers of a later date.

In pagers of a later date.

The two Charleston citizens to Col. Ruther, in which they arow themselves personally unknown to him, and arow further that they do not even know the name of the individual whom toey denounce, and that they have never seen him; but they denounce, and that they have never seen him; but they denounce him on the author ty of a passenger in the ateamship, who refused to allow them the use of his name. The discrifier, from which we condense these statements, says:

"Mr. Brewster is perfectly sure that during his stay at the Stuth he never spoke of slavery, or any topic incidental to its discussion, and had determined to pursee this incidensive course of non-interference during the whole period of his angagement there."

This outrage is a perfinent commentary on the following extract from Mr. Yaney's recent speech in Faneuit Hall. It occurred in Mr. I ancey's own State, and not very far from the town in which he resides:

"You go with your labor where you please."

A Voice,—"No sir' we can't go South."

Mr. Yaney.—"Yes sir, you can go South. There isn't a max among you who is not welloome, if the don't come to steal our niggers. We have merchants and mechanics in Montgomery, and we have men who dod in shoos and hats and other goods from New England who are honored and respected cuitiens with ourselves. There on of try to steal our property and they stay."

We present this most recont illustration of the

de Alreay there is unessiesse throughout the South, as to the stability of its institution of slavery. But with a submission to the rule of Abolitionisal at Washington, thousand of sizer, who deep will despise of the institution. While the control of the stability of the institution. While only the control of the contro

Ratif we submit, and do not dissolve our anion with the Nortic, we make the triumph of our Abolition essente complete, and canals them to consolidate and wield the power of the Nortic for our destruction.

10. If the South once submits to the rule of Abolitionists by the General Government, there is, probably, an end of all peaceful separation of the Union. We can only escape the rain they meditate for the South, by war. Armed with the power of the General Government, and their organizations at the North, they will have no respect for our courage or energy, and they will use the saword for our subjection. If there is any man in the South who believes, that we rust separate from the North, we appead to his homeous connection with the North, before the Abolition and the South who believes, that we rust separate from the North, the separate to his second connection with the North, before the Abolition and the South who believes, that we rust separate from the North, the separate to his house our connection with the North, before the Abolition and the South who believes, that we rust spearate from the North, the separate the North, the separate to his house our connection with the North, be separate to his house our connection with the North, before the Abolition and the South who believes, that we rust of the North Rose of the North Abolition and the South who believes, that we rust of the North Rose of the North Abolition and the South who believes, that we research to his solve of the North Rose of the North Abolition and the South who believes, that we research the North North Abolition and the South War Tabolita and the South War Tabolita

A GREAT EXPORT MOVEMENT.—The exports from the port of New York for the past week are valued as more \$3,600,000,—larger by neurity a million, them nore \$3,600,000,—larger by neurity a million, them nore by the past week in the history of our commerce. Nearly or quite one-half of this great value was made up of breadstuffs, and included the following quantities of domestic produce; 7.000 base cotion, 90,200 barrais flour, 900,000 bashes wheat, \$45,000 barrais resin, 2,725 % hds. and cases tobacco, \$32,-000 ibs. magningsined cobacco, \$31,000 ibs. tallow, 4,900 bales hops, 29,600 ibs. whisebone, 1,900 page cotion goods. Liverpool and London take nearly one-half the value of the exports, and British ports, in the United Kingdom, Ireland, or dependencies more than two-thirds. Indeed, except cotion to Havre, there is little to swell the value of the exports to other than British ports. The effect of the heavy shipments is British home ports has depressed exchange, and nearly stopped the export of specie.

MAN KILLED BY THE CASS —A young man by the name of Frank Riddebusi, a workman in Dalton & Ganas' establishment was killed by the Friday night express train. It seems from the appearance of the body, that he had passed down the track about one-formed of misconarroom the dear and name

ex in number, were in mediately taken violently ill, vemiting, &c. One died on Saturday and two or three more are not expected to recover. It is said that persons entering the house were seized with vemiting, and dogs who ale pieces of the fish died immediately. Others ate fish takes from the same lot without injury.—Cartinville (Ill.) Ever themory.

FRAM ACCIDENT NEAR HUDSON.—We learn from the Guestie that a young man named George Jackson, aged 17 years, was accidentally shot by a mean named Norman Young, in the woods of Mr. Jonathan G Owens, about sixty rods from his house, on Sunday of last week. Jackson and Young were both hunting. Young fired at a rabbit, the ball glanced and struck jackson in the abdomen, and lodged in his backbone. He was taken to the residence of Mr. Owens, where he died at 5 o'clock.—Advian 12000100.

— A cave, five feet wide, and from six to sight feet high, which is unmistakably srifficial has been discovered in the side of Lookest Mountain, Ga., and explored to the distance of 185 feet. Stone peatsis, small pieces of iree, hatclet handles, and nameiess Indian relies, are found scattered all the way, and it is thought to have been a secret refuge for the Indians in times of trouble.

— The census develops the curious fact that there are more Scotch descendants in London than its Edisburgh, more Irish than in Dublin, 100,000 more Remanists than in Rome, and more Jew than in Palestine. There are also in the same metropolis to less than 6,000 Italians; a very large number of Assistics, from all parts of the Dast, and many who still worship their idola.

A good sell is related of a wealthy banker,
here, who is very good natured, but inclined to
be a trifle fast in his riews of his. He had a
favorite clerk, a young man about twenty one,
remarkably handsome, modest, and highly intellectual. For these qualities he was inked by
every one, and the banker did not escape the
general feeling of good will. He was as peoas—his salary, and had no connections to push
his after fortuces, and so, like most English
clerks, he would rise to a hundred and twenty

A COMPOSITING PAGE
Immediately after the result of
tions in Pennsylvania and Indians
made known, the Caicago Times as
repudiating all its pust professio
forth in an open invitation to the
States to dissolve the Union. It as
farrency of italica. inst behalf, are equally applicable and his party, if the prospects of a ware equally imminent with that publican nomines. This is a comine doubt, for the fines and Heraid not the obvious purport of the artic we refer, in that sheet of the 13th ins Times and Heraid has been really Breckingidge all the time? A few the South are threatening disunion, in the event of Mr. Lincoln's elsevine of the description of any on the event of the election of any one the event of the election of any om mae Breckinridge; and the Chicago Herald openly encourages their tra sign. What is the inference?
